Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 March 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 15-26 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 15-26 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 10 August 2006 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

DETAILED ACTION

1. Claims 15-26 are currently pending.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/20/2007 has been entered.

Claim Objections

3. In view of the amended claims, all objections in the prior Office Action are withdrawn.

Claim Rejections - 35 USC § 112

4. The U.S.C. 112, second paragraph rejection of claims 15 and 21 has been withdrawn in view of the amended claims.

Response to Arguments

5. Applicant's arguments with respect to claims 15-26 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claims 15-26 rejected under 35 U.S.C. 103(a) as being unpatentable over McClure (US Pat. 5,841,709) in view of Tanishima et al (US Pat. 6,999,357; hereinafter referred to as Tanishima).

As per claims 15 and 21:

McClure teaches a method for testing memory, said method comprising:

- testing functional memory (col. 4, lines 14-17);

- repairing the functional memory by adding access to redundant elements (col. 4, lines 17-18);
- re-testing the functional memory which has been repaired (col. 8, lines 3-7);

Not explicitly disclosed by McClure is adding access to additional redundant memory which is not required for the repair; and after re-testing the functional memory and adding access to the additional redundant memory which has been added which was not required for the repair, testing the additional redundant memory which has been added which was not required for the repair.

However, Tanishima in an analogous art teaches adding access to additional redundant memory not required for the repair (col. 6, lines 30-44) and testing the additional redundant memory (col. 7, line 66 to col. 8, line 8). Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to apply the method of Tanishima to access and test the unused redundant memory of McClure. This modification would have been obvious to one of ordinary skill in the art, at the time the invention was made, because one of ordinary skill in the art would have recognized that Tanishima provides a simple circuit configuration for performing tests of all the redundant memory cells without writing to the redundant replacement array (col. 2, lines 25-30) and would have enabled the additional redundant memory to be tested (col. 6, lines 43-44).

As per claims 16 and 22:

McClure further teaches using repair information to repair the memory (col. 6, lines 8-20; a redundant column select signal is repair information).

Art Unit: 2117

As per claims 17-20 and 23-26:

Tanishima teaches forcing usage of redundant elements which are not needed to be used for repairing the memory; and faking defects to remap good elements with redundant elements (col. 6, lines 30-44 and col. 7, line 66 to col. 8, line 8).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Miner et al (US 5835431) teaches testing of redundant cells without having to blow a fuse for mapping the cell.
